A Description of the Four
Quarters of the Year

And First of Winter.

Sec. in v. p. 431

Winter Quarter (after the Astro-
nomers Account) began the
Eleventh of December, 1689,
at 10 of the Clock, in the
morning, and continues till the 9th. of March
this year 1691. So that alwayes the first part
of the Astronomical Winter, is in one Politick
year, and the latter end thereof is in the other.
At which was the shortest day of the year, by
reason of the Suns greatest declination from
the Equinoctial Line.

This Season, of its own disposition, is known
to be cold and moist, contrary to the quality of
the Summer, and, in this quarter, the inward
parts of Man are very hot, and being healthful,
may receive plenty of Food, because natural
heat is now comforted, and is gone inward,
and there increaseth, and maketh digestion the
better.

How the Weather will be therein disposed,
is noted for each day throughout the Quarter.

The Sickneses whereunto this Quarter is
most enclined, are *Rheumes, Coughs, Piles, Sore-
Eyes,*

DADE, 1681.

Eyes, Melancholy, Coughs, Catarrhs, Sciaticas, Falling-Sickness, Diseases proceeding of Rottensness and Corrupt Humors; with divers kind of Infirmities incident among Women.

Of the Second Quarter of the Year, called the Spring.

Sol. in γ , ν , II.

THe Spring time (being the most pleasant and wholesome Season of the Four) taketh its beginning on Wednesday the 9th of March, at 3^h min. past 8 at night, when the Sun entrencheth into the first minute of the Equinoctial point *Aries*, making the dayes and nights of equal length; which quarter endeth the 10th. of June, when the Sun entrencheth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The particular condition thereof may be seen in the daily disposition of the Season.

The Infirmities of this Quarter are Melancholy, Madness, the Falling-Sickness, Bleeding at the Nose, Hoarseness, Coughs, Itch, Scabies, many Ulcers, and small Apostumes, the Gout, and Pain

A Prognostication.

*Pain in the Joynts, Plurisies, Dropsies, Pestilent
Agues, Shortness of Breath, Fainings, Pain in
the Head, Eyes, and Stomach, Rotten Fevers, and
other Strange Diseases.*

Of the Third Quarter of the Year, called Summer.

Summer (accounted the Third part of the
Year Astronomical) taketh alwayes its be-
ginning at the time of the Suns entrance into
the first min. of the Solstitial Sign Cancer, which
is this year on Friday the 10 of June, 50 min. af-
ter Midnight, at which time he makes
his greatest declination from the Equinoctial to-
wards the North, and causeth the longest day,
and shortest night in the year; and so Summer
holdeth on till the 12 of September following.

In this Quarter the Stomach cannot digest
such hard Meats as it will in the Winter season,
for that natural heat is now distributed into the
exterior parts, and man is not now so hot with-
in as in Winter.

As for the disposition of the Weather, you
may see in the daily inclination.

The Sickneses at this time are divers, as,
*Burning Agues, Plurisies, Frensies, Hot Apoptumes,
Divers pains in the Head, Sundry Inflammations,
and New Infirmities, proceeding especially of Hot*

Cholrick, Plagues, & where with many will be
fore mofsted.

Of the Fourth Quarter of the Year,

called *Autumn* or *Harvest*

beginning

Sol in ♌, in 7.

A *Utumn*, or *Harvest* (being the Fourth, or
last Quarter of the Year) beginneth up-
on Munday the 12 of September in the af-
ternoon, the Sun then making his entrance
into the first minute of the second Ecclesiastical
Sign *Libra* working the consequence that he did
at his entrance into *Virgo*, that is, making the
dayes and nights of equal length, *Libra* is fix
in the morning, and is fix at night, and
this Quarter doth last until the eleventh of De-
cember following.

The quality of this Season is naturally cold
and dry, yet by reason of its mutability, it is
the most unwholesome; by means whereof, it
is more subject to sickness then any other, for
the drugs of all diseases of the former parts of
the year, will now break forth, and be seen.

How the Air is like to be inclined in the even,
may be seen in the daily disposition of the Sea-
son.

The Diseases of this Quarter are like to be ma-
ny and dangerous, as *Black Jaundies*, *Me-
grims*, the *Falling Sickness*, *Opilations in the Spleen*
difficulty

The Conclusion.

THe year now like the Hieropimick Snake,
His rounding Tail into his Mouth both take.
Christmase is come, make ready the good cheer,
Apollo will be frolick once a year.
I speak not here of Englands twelve days madness.
But humble gratitude and brawny gladness.
These but observe, let Enthusiasts speak out,
We may be merry, and we ought no doubt.
Christians, 'tis the Birth-day of Christ our King,
And we disputing, while the Angels Sing.

A Prognostication.

Natural Prognosticks for the judgment of weather.

THe foregoing Rules for the Judgment of the weather are such as are deduced from the Affections of the Planets to the Moon, and among themselves: these here following are such as are deduced from the Affections of the Elements themselves. Therefore

1. The murmure of the South-wind, and the murmure of Winds in the Woods, when the wind is not stirring abroad doth shew Wind to follow.

2. The appearance of the Southern Star, sheweth Tempests.

3. When Stars appear in the North, Wind comes from that Quarter.

4. If two Rainbows appear, Rain follows: but a Rainbow appearing after Rain, signifieth fair weather.

5. If the Sky be red in the morning, it is a sure token of Wind or Rain to follow, or both, for the vapors which cause that redness will soon be dissolved.

6. If the Sun or Moon look pale, look for Rain: if fair and bright, fair weather.

7. If a Cloud appear in the morning, in which the Sun is soon after hid, it will dissolve it, and Rain will soon follow.

8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.

9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.

10. If a black Cloud appear in the West about Sun-setting, it will rain that night, or the morning following.

11. If Mills come down from the Hills, or descend from the Sky, and settle in the Vallies, it portends fair and hot weather. Also Mist ascending in the evening from the Earth, or Water, sheweth a hot day to follow.

12. Water-Fowls, (as Sea-Gulls, Mergers, &c.) when they flock and fly together from the Sea towards the shore: As also when Land-Fowls (as Crows, Swallows, &c.) when they fly from the Land to the water, bearing their wings with their wings, sheweth Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain, and the same of the Circles about the Moon.

14. The Trefoll Grass, against Rain, swells in the stalk, and standeth more upright.

15. The Window-pipe (growing in Stubble-fields) if you find it open in the morning, is sure of a fair day to follow.

16. Aches, Hurts, and Corns, do not grieve against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident signs of rain to follow.

18. Solid Bodies, as Stone and Wainscot, when they sweat, do shew Rain.

DADE, 1681.

*Natural Prognosticks of Pestilential,
and unwholsome Years.*

1. **W**hen there are great number of Frogs, Flies, Locust, &c. For these Creatures being ingendered of Putrefaction, shew a general disposition of the Year, and constitution of the Aire to Putrefaction.

2. When Worms are found in Oake-Apples.

3. Great and early heats in the Spring (and chiefly in May) without Winds.

4. Great drought in Summer continuing to the end of *August*, portend a Pestilential Summer the next year.

5. The Small Pox, Purples and Agues in the Summer, and hovering all the Winter, portend a great Pestilence the Summer following.

6. A dry *March* and a dry *May* portend a wholesome Summer, if there be a showering *April* between.

Signs of a Sound and Pure Aire.

1. A Sound and Pure Air is made hot presently after the Sun rising, and is made cold immediately after his setting.

2. That which yieldeth a pleasant smell after Rain, clear, and not evaporated, open and Nightsome, and when the North-wind bloweth.

3. Where there are Easterly Winds in the Mornings.

Signs of a Corrupt and Infectious Aire.

1. A Corrupt and Infectious Aire is made by the often blowing of the South, or South-East winds;

A Prognostication.

windes : or by the West, or South-west wind
in the evening.

2. When the Aire is cold long after Sun-set,
3. When the Aire is long hot after Sunsetting.
4. When the Air is long close, cloudy, or thick.

Of the Properties, and Natural Effects of the Seven Planets.

Saturn.

Saturn being well posited, is like a grave Coun-
sellor, and a Man of authority thinking of great
matters, a lover of Secrets, Diligent, Solitary, Co-
vetous, Studious and a Zelotype — Being evil
affected, he is an Abject, a Pick-thank, fearful,
given to Solitariness, Sad, Stubborn, Ill-willy,
Deceitful, Sloathful, Dull, a Lyar — By nature
he hath relation to Husbandmen, Masons, Black-
smiths, Diggers in the Earth, Tanners, and the like

Jupiter.

Jupiter is said to be the greater Fortune, and of
Nature is benevolent ; Being well situate, he
maketh men honest, prone to good duties, pious,
magnanimous, vericundious, modest, wise, dili-
gent, liberal, and yet careful of their own — Being
evil disposed, he is more prodigal and stout — He
signifies, Bishops, Church-Governours, Lawyers,
Judges, Governors of Towns and Cities, and
Ecclesiastical Persons.

Mars.

Mars being well-affected, is valiant, gene-
rous, hasty, given to War, fearing no danger, im-
patient

patient of servitude, and injuries, not respecting riches — But being badly seated, he is irascible, cruel, prodigal, a tyrant, a murderer, and the author of discords and seditions — He hath relation to Soldiers, Surgeons, Turks, Fire-works, &c.

Sol.

He is magnanimous, valiant, provident, a giver of long life, and a healthful Body — He maketh Men wise, famous, desirous of honors, having signification of Kings, Princes, Dukes, Marqueses, Earls and Potentates.

Venus.

Venus being well seated, maketh men fair spoken, pleasant, fair, delicate in gesture, given to pleasures, sociable, merciful, &c. — But being ill affected, she is effeminate, timorous, a lover of Maids, sluggish, lustful, a Zealot, and given to idleness.

Mercury.

Mercury being well seated, causeth a sharp wit, maketh men studious, and capable of Learning — Being ill seated, he is subtle, crafty, malicious, and a Liar — Of Persons, he signifieth Philosophers, Poets, Mathematicians, Seiveners, Merchants, and the like.

Jupiter.

The *Moon* maketh men unconstant, fearful, prodigal, studious of Histories, and given to Navigation and Planting — She signifies Embassadors, Legates, Queens, Ladies, also Common People, Fishers, Watermen, and such like.
